Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

 ~~Claims 13 is rejected under 35 U.S.C. 102(b) as being anticipated by~~

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 13 is rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Haight (3644942). Haight discloses a method of preparing an area of ground surface on which will be constructed an above ground pool 10 with a pool liner 14. The method comprising:

- Providing a prefabricated pad 22 in a plurality of segments 16 and 28;
- Assembling the segments on the ground surface area as shown in figure 7;
- Constructing the above ground pool 10 over the padding; wherein said padding 16/28 is interposed between the ground 13 and pool liner 14

Art Unit: 3635

preventing the liner from contacting the ground 13 in the area of the padding;

- Erecting a continuous wall 11 around the padded area;
- Lining the continuous wall 11 and the padded area 16/28 with the pool liner 14 as shown in figure 7 that this method has been employed to arrive at the disclosed structure.

The pad is interposed between the liner and the continuous wall 11. The method has been considered to be formed by Haight because the recited and disclosed structure is shown to exist.

The material for the pad has been considered a matter of choice; One of ordinary skill in the art would have appreciated all the pads made of elastic polymer foam and would have selected any material for the pad capable of having the structure to operate and function as intended.

Allowable Subject Matter

Claims 1, 3-6, 8-9, 11 are allowable over the prior art of record.

Response to Arguments

No arguments were filed with respect to the Haight reference.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
